## HOW TO USE TIANI™

Tiani™ is an intercourse-enhancing vibrating massager designed to be worn by women. To wear, simply bend Tiani™'s non-vibrating flexible silicone arm to a 90 degree angle and insert into the vagina. When inserted, gently place Tiani™'s vibrating pleasure point over the clitoris, while you will be able to control vibrations via wireless remote. The smooth flexible design allows plenty of room for sharing the pleasure with a partner.
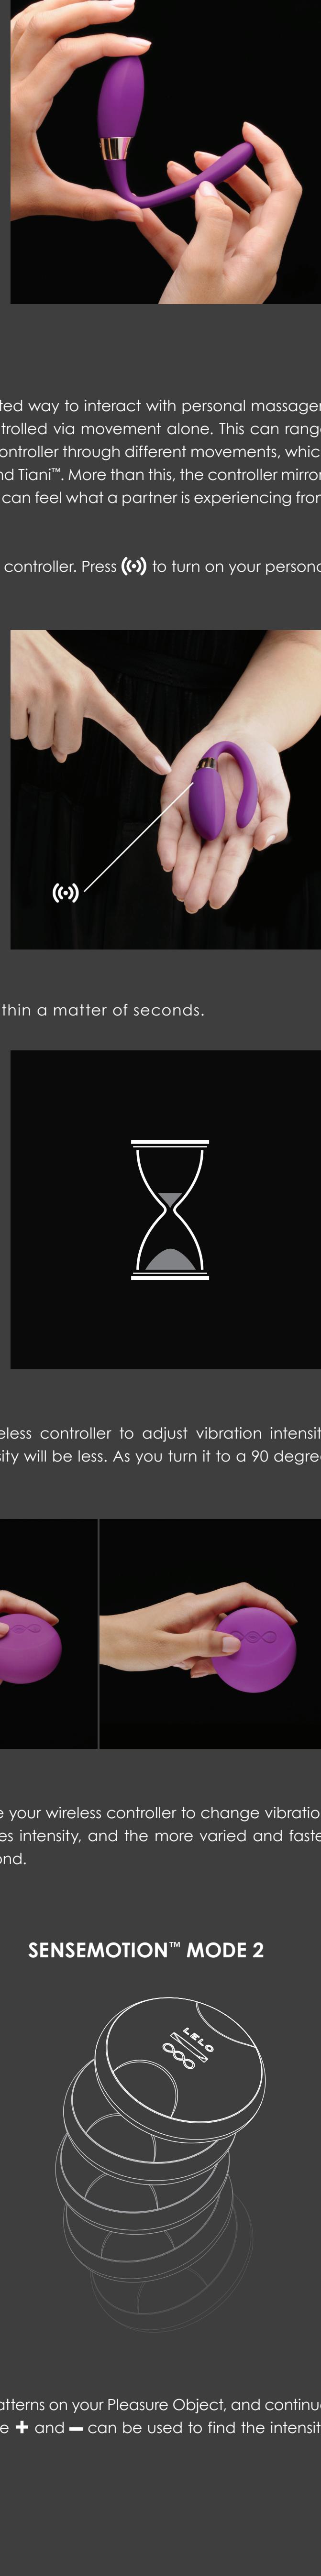

HOW TO USE SENSEMOTION™?

SenseMotion™ Technology offers an unprecedented way to interact with personal massagers, where vibration speed and intensity can be controlled via movement alone. This can range through tilting, shaking or sweeping the wireless controller through different movements, which in turn prompts a response in your Lyla™, Oden™ and Tiani™. More than this, the controller mirrors the vibrations you are creating, which means you can feel what a partner is experiencing from a range of up to 12 meters/39 feet.

GETTING STARTED: Press **+** to turn on your wireless controller. Press **((•))** to turn on your personal massager and initiate.
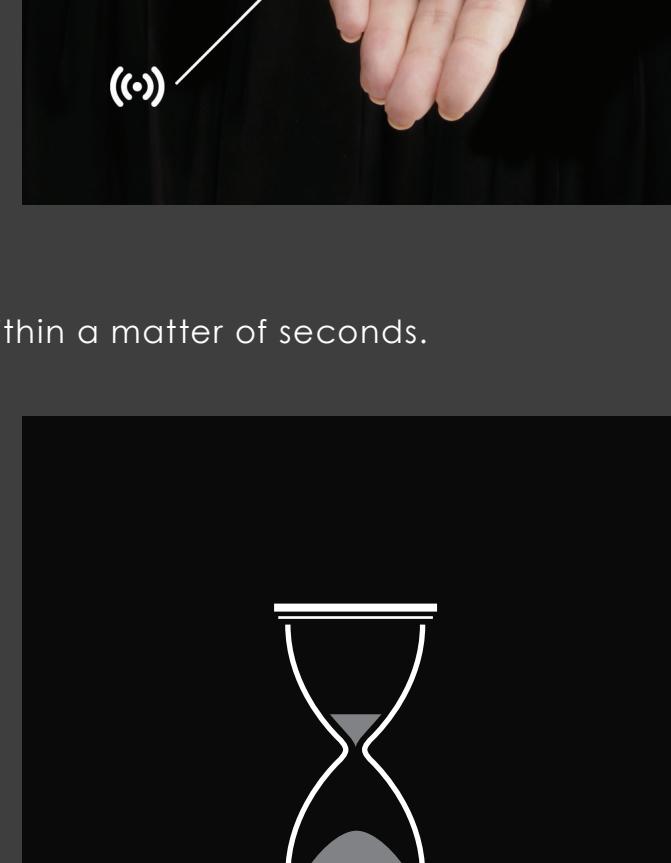

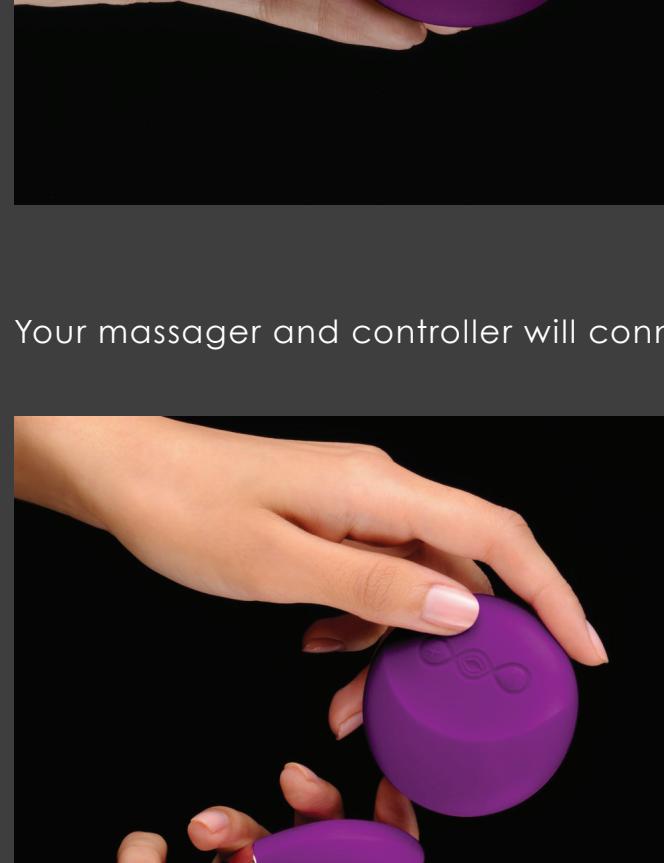

Your massager and controller will connect within a matter of seconds.

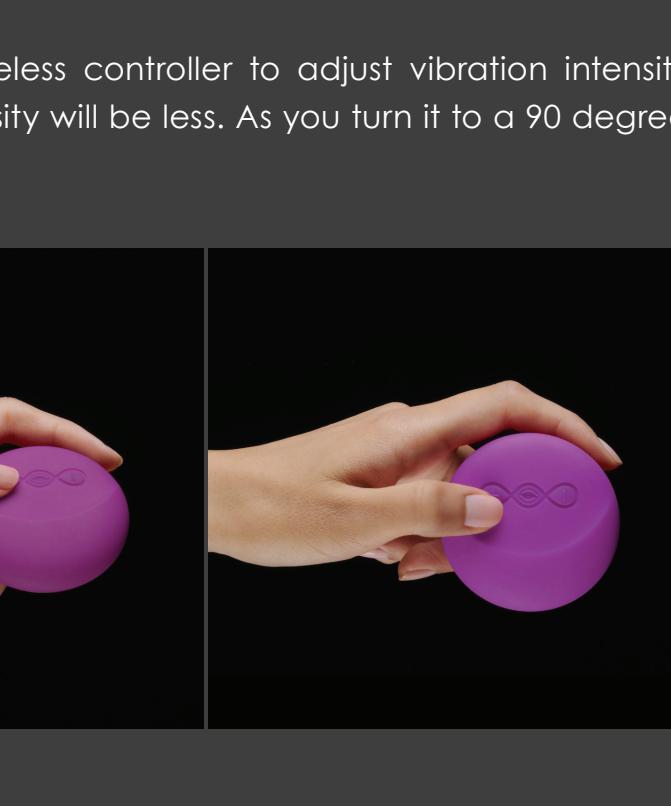

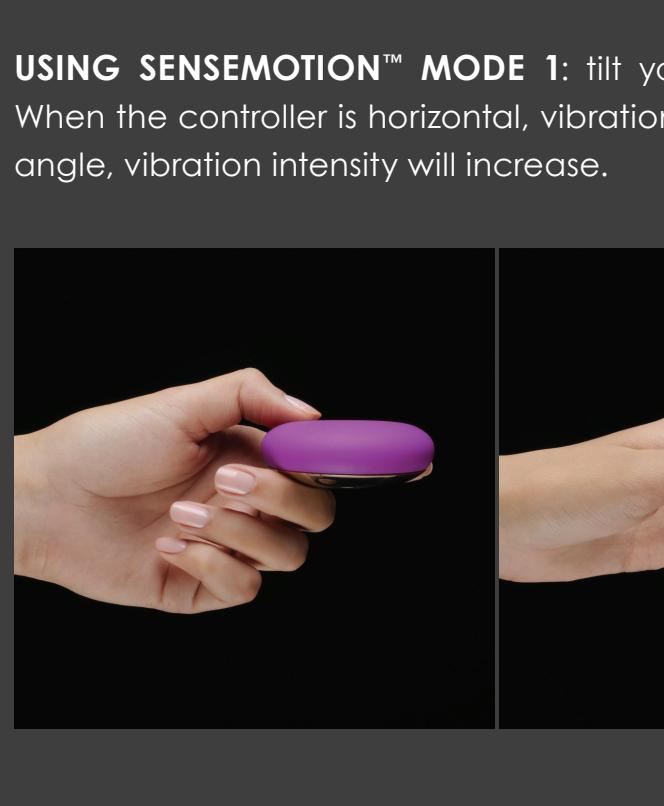

USING SENSEMOTION™ MODE 1: tilt your wireless controller to adjust vibration intensity. When the controller is horizontal, vibration intensity will be less. As you turn it to a 90 degree angle, vibration intensity will increase.

USING SENSEMOTION™ MODE 2: shake or rotate your wireless controller to change vibration intensity. Moving in circular motions also increases intensity, and the more varied and faster your movements, the more your Insignia will respond.
